Muvi LE™ and MuviView™

Body-Worn Camcorders for Law Enforcement

The Muvi Series of video recorders for law enforcement are the smallest video recorders available and are ideal for evidence collection. Their portable, lightweight design can be integrated into any uniform. They can begin recording by voice activation or by the press of a button. With a built-in microphone and crisp wide-view lens, you can record what you see and hear, even when you are away from your vehicle. The recorder simply clips to your pocket or tie, or has other mounts and brackets available. MuviView has the additional option of attaching to the dash or windshield of your vehicle.

The law enforcement grade Muvi LE and MuviView recorders are ideal for multiple surveillance tasks.

Recordings can be viewed or downloaded on any computer by plugging the unit into a USB port with the supplied cable. In addition, MuviView recordings can be played back using the built-in video screen and speaker.

The battery can be recharged using the same cable USB cable, or using an optional AC adapter. The built-in rechargeable Lithium battery of the Muvi LE and MuviView provides 3 hours of recording time between charges. MuviView can also be charged from a 12VDC cigar plug adapter.

Learn more about these camcorders, contact your MPH representative or visit our website today.

Four basic models of camcorders

- Muvi LE basic camcorder with 2GB memory
- Muvi LE Pro enhanced camcorder with date/time stamp, enhanced frame rate, and 4 GB memory
- MuviView HD10 super high definition camcorder with 1080p high-def recording, and 4 GB memory
- MuviView HD Pro super high definition camcorder with 1080p high-def recording, and 8 GB memory, and multi-surface suction mounting bracket
- All Muvi and MuviView recorders also include internal rechargeable lithium-ion battery, USB download/charging cable, and bracket pack. Memory size can be increased on all models.
- MuviView recorders also include a built-in 1.5" viewing screen and speaker for playback, 5 MP snapshot function, wireless remote control, power saving features, and enhanced lens for night use.
