

# VersaCam™ Portable In-car Video System

## Total Video Protection™

- ★ A complete in-car video system contained in one small package.
- ★ Mounts in the vehicle like a standard video camera.
- ★ Interfaces to the vehicle and automatically records when emergency lights or other triggers are activated.
- ★ Vehicle location is automatically recorded.
- ★ Removes quickly from the vehicle to document evidence inside suspect vehicles and in other locations not visible from the patrol vehicle.
- ★ Reinstalls in the vehicle in seconds.
- ★ Back-end software is searchable by time, location and other parameters.

## Features

- Rugged One-Piece HD Digital Recorder** .....
- Integrated Fold-away Monitor** .....
- Solid-state memory module** .....
- Built-in GPS module** .....
- Quick-release mounting bracket** .....
- Vehicle interface module** .....
- Convenient video management software** .....
- Belt-pack and in-car microphone systems** .....

## Benefits

- Occupies little space in the vehicle. Excellent recording quality in high definition. Built-in microphone.*
- Minimizes the size of the unit in normal use.*
- Reliable, skip-free recording on even the roughest roads.*
- Locations of events and pursuits are recorded. Locations of key events can be tagged for later use.*
- Easily remove the recorder to film events and evidence away from the patrol vehicle. Quickly reinstalls in the bracket in just seconds.*
- Allows the recorder to be activated automatically by the emergency lights, siren, or two other triggers. Also allows officer to manually activate the recording from a conveniently located button.*
- Catalogs the video by date, location, and other data. Has map interface to allow videos to be selected based on the location the event occurred.*
- Record events inside and outside of the patrol vehicle. Belt-pack includes in-car and desktop chargers.*

**The company:** MPH Industries, Inc. is the oldest manufacturer of in-car video systems, beginning with the Tech Systems DocuCam I in 1988. MPH also leads the law enforcement industry with its line of speed measuring equipment. MPH Industries is a subsidiary of MPD, Inc., a manufacturer of aerospace components and subsystems, electronic components, and breath alcohol systems. MPH Industries and MPD are 100% Employee-owned ESOP companies.

# VersaCam Removable In-car Video System

**Description:** VersaCam is a complete portable video evidence collection system. It includes a solid-state video recorder that can be mounted discretely in the vehicle, and can quickly be removed to record activity and evidence away from the vehicle. The vehicle interface of the unit allows the unit to be easily placed into Record mode manually by the officer, or automatically by the emergency lights, siren, or any other trigger. Audio is recorded from the internal microphone and the wireless belt-pack. Back-end cataloging software is included, and supports several types of searches, including locating videos based on the location (from the internal GPS).

## One-piece HD recorder system

- ❖ Microprocessor-controlled, 1080p high-definition recorder.
- ❖ 12x optical zoom, 160x digital zoom
- ❖ 360 degree rotation to allow filming of back seat
- ❖ Easily removable to record incidents and evidence away from the patrol vehicle.
- ❖ Backlight camera controls on the rear of the camera for ease of operation.
- ❖ Built-in GPS system.
- ❖ Image stabilization for in-car or handheld use.
- ❖ Size: 2 1/8" x 2 5/8" x 5 1/8"
- ❖ Records to flash memory. Recorder has 32 GB of internal memory and records up to 13 hours before downloading.
- ❖ Integrated 3" monitor for setup and playback.
- ❖ Complete internal battery back-up, so that it can record even if the patrol vehicle is incapacitated (for example, by an accident).
- ❖ Recorder can operate up to 2 hours from the battery pack.
- ❖ Recorder can take still pictures (7 Megapixels) in addition to HD video recordings.
- ❖ Built-in microphone for audio recording when handheld.
- ❖ Low light operation mode.
- ❖ Automatic lens cover protects lens whenever recorder is powered off.

## Digi-Talk™ 2.4 GHz Wireless Microphone

- ❖ Uses spread spectrum communication. Synchronizes to any other Digi-Talk system when placed in recharging cradle.
- ❖ Recorder begins recording automatically when microphone is turned on. VersaCam can also automatically activate and turn off belt-pack.
- ❖ Has internal microphone and antenna. Also supplied with Lavalier mike with tie clip and windscreen.
- ❖ Operating range of over 1000 ft.
- ❖ Includes covert in-car microphone.

## Vehicle interface unit

- ❖ Includes a manual record and zoom buttons, can be located conveniently within officer's reach.
- ❖ Interfaces to emergency lights, siren, or other recording triggers.

## Video management software

- ❖ Organizes videos by camera, date, recording location, and other parameters.
- ❖ Graphical map interface in addition to traditional catalog views.
- ❖ Runs on any Windows-based computer.

**Easily removable for recording evidence away from the patrol vehicle.**

**Details of the video management software**

**Manage videos easily by date, time, situation.  
Use map interface to manage videos by location.**
