Installation Guide Ford Taurus Interceptor Center Dash Radar Bracket

PT# ai.951660

Installation Materials

903787G01	F	910656G01	G
	QUANTITY 1		QUANTITY 1
Uni. Mounting Bracket		Radar Dash Bracket	

903405	H	903354	I	910658	J
	QUANTITY 4		QUANTITY 4		QUANTITY 2
6-32x.250 Screw		#6 Lock Tooth Washer		Hex Cap Screw	

900025	K	900024	L	903542	M
	QUANTITY 3		QUANTITY 1		QUANTITY 1
Disc Spring		Nylon Washer		Wing Nut	

620009	N	910653	O	
	QUANTITY 1		QUANTITY 2	
Scotch Foam		Fender Washer		Used ONLY with the Python 2

Installation Process

1

Place the Display Bracket (A.1) onto the Universal Mounting Bracket (F.2). Use Flat Head Screws (C.1) to secure the two brackets together. Lock tight with KEP Nut (B.1)

2

Take the Radar Dash Bracket (G.2) and place Nylon Washer (L.2) on the stud of the Radar Dash Bracket (G.2). Place the stud through of the center hole of the Universal Mounting Bracket (F.2). Secure with a Disc Spring (K.2) and a Wing Nut (M.2). Tighten.

3

Once built and tightened, take the Scotch Pad (N.2) and place it on the center bottom part of the Universal Mount Bracket (F.2).

4

Place the combined substructures onto the center of the dash tray. On the Radar Dash Bracket (G.2) place the Hex Cap Screws (J.2) through the outside holes of the bracket separated by a Disc Spring (K.2). A Fender Washer (O.2) will go through the Hex Cap Screws (J.2) and separate between the Radar Dash Bracket (G.2) and the dash tray of the car.

5

Place the radar unit onto the Display Bracket (A.2). Fit a Flat Nylon Washer (E.1) onto a Stud Knob (D.1). Place another Nylon Washer (E.1) between the radar unit and the Display Bracket (A.1). Repeat for other side.

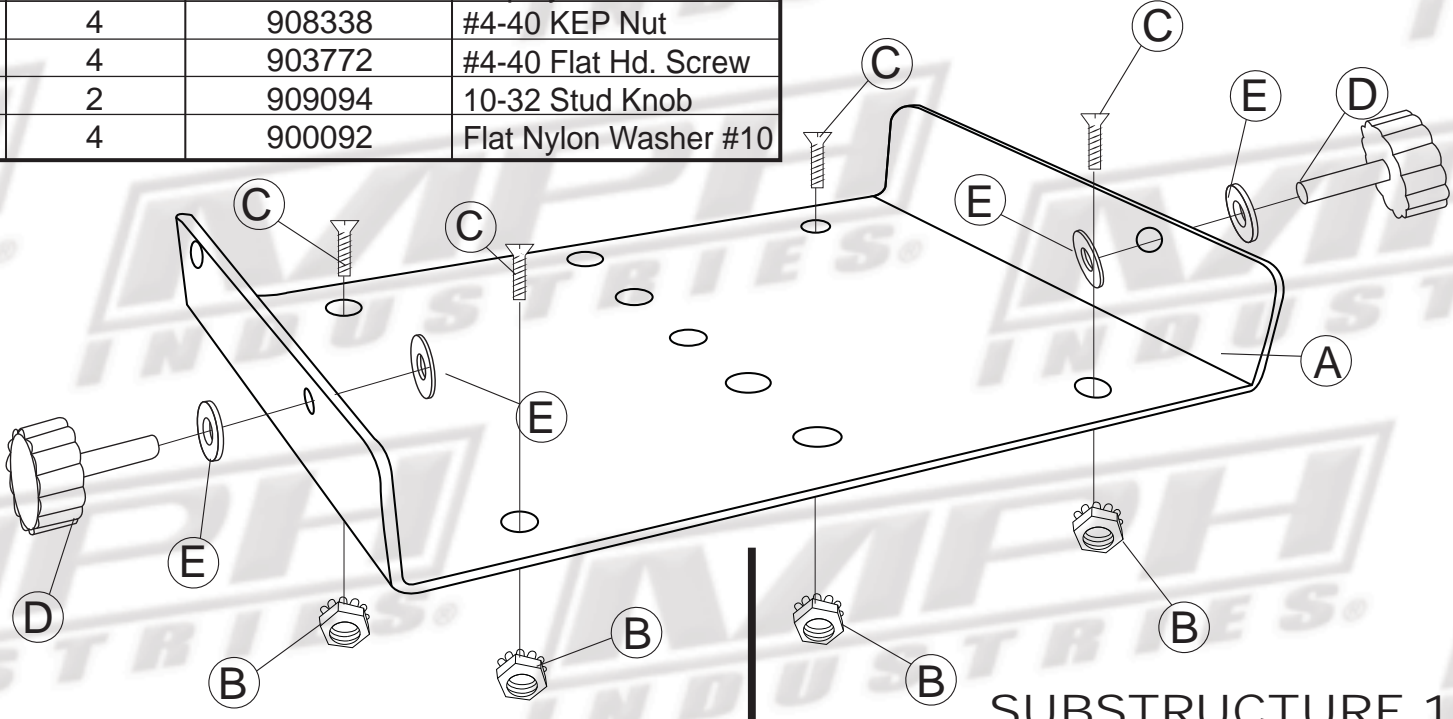

6

When Finished, the Radar Bracket can be adjusted by loosening the Stud Knobs (D.1) and moving the radar unit in the direction preferred by the person.
